# PayYourWeigh

Fleet Rate & Driver Compensation Portal

## PROPOSAL & IMPLEMENTATION OVERVIEW

Give your owner-operators consistent trip-pay estimates and a clear view of fuel surcharges, accessorials, operating costs and net profit per mile. Each company receives a separate customizable workspace in one owner-controlled platform.

### Hybrid pricing: one-time setup + monthly subscription

| Package | Setup | Monthly | Drivers |
|---|---|---|---|
| Starter Fleet | $1,500 | $199 | Up to 25 |
| Growth Fleet | $2,500 | $499 | Up to 75 |
| Enterprise Fleet | $4,000 | $799 | 75+ |

### Workspace scope

Company branding, official mileage bands, fuel surcharge rules, accessorial fees, designated accounts and lane presets; company owners/admins manage membership and publish rates. Driver truck costs and saved trips remain private on the driver's device.

### Training & reporting

**Dispatch training:** a planned 30-60 minute live onboarding session covering rates, lanes, fuel updates and driver rollout. Starter add-on: **$500 one-time**; included with Growth and Enterprise.

**Monthly cushion & margin reporting:** a planned review of agreed lane profitability and cost-versus-pay trends. Starter add-on: **$195/month**; included with Growth and Enterprise. Report delivery and authorized data-sharing arrangements must be agreed before rollout.

### Implementation & commercial terms

1. Confirm package, company branding and authorized administrators.
2. Import and validate your rate schedule and lane data.
3. Agree training, reporting scope and rollout timing.
4. Activate billing and invite drivers only after launch approval.

Demo status: no payment is collected or subscription activated. Training and reporting selections are not proof of delivered services. Live billing, reporting delivery and final rollout timing require a separate agreement. Code ownership stays with the platform owner; companies customize their own isolated workspace.
